

**AXA INSURANCE PUBLIC COMPANY LIMITED**

**INTERIM FINANCIAL INFORMATION (UNAUDITED)**

**31 MARCH 2020**

## AUDITOR'S REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

To the Shareholders and the Board of Directors of AXA Insurance Public Company Limited

I have reviewed the interim financial information of AXA Insurance Public Company Limited, which comprises the statement of financial position as at 31 March 2020, and the related statements of comprehensive income, changes in equity, and cash flows for the three-month period then ended, and condensed notes to the interim financial information. Management is responsible for the preparation and presentation of this interim financial information in accordance with Thai Accounting Standard 34, "Interim Financial Reporting". My responsibility is to express a conclusion on this interim financial information based on my review.

### Scope of review

I conducted my review in accordance with Thai Standard on Review Engagements 2410, "Review of interim financial information performed by the independent auditor of the entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Thai Standards on Auditing and consequently does not enable me to obtain assurance that I would become aware of all significant matters that might be identified in an audit. Accordingly, I do not express an audit opinion.

### Conclusion

Based on my review, nothing has come to my attention that causes me to believe that the accompanying interim financial information is not prepared, in all material respects, in accordance with Thai Accounting Standard 34, "Interim Financial Reporting".

### Emphasis of matter

I draw attention to note 3 of the interim financial information, which describes the accounting policies in relation to adopting the temporary exemptions announced by the Federation of Accounting Professions to relieve the impact from COVID-19 for the reporting periods ending between 1 January 2020 and 31 December 2020. My conclusion is not modified in respect to this matter.

The accompanying notes form part of this interim financial information.

## **1 General information**

AXA Insurance Public Company Limited (“the Company”) is a public limited company incorporated and domiciled in Thailand. The address of its registered office is as follows:

23<sup>rd</sup> Floor, Lumpini Tower, 1168/67 Rama 4 Road, Sathorn, Bangkok.

The principal business operation of the Company is general insurance. The Company operates only in Thailand.

These interim financial information was authorised for issue by the Company’s management on 20 May 2020.

This interim financial information has been reviewed, not audited.

## **2 Accounting policies**

### **2.1 Basis of preparation**

The interim financial information has been prepared in accordance with Thai Accounting Standard 34 Interim Financial Reporting. The primary financial information (statement of financial position, statement of comprehensive income, statement of changes in shareholders’ equity and cash flows) is presented in a format consistent with the annual financial statements complying with Thai Accounting Standard 1 Presentation of Financial Statements. In addition, the interim financial information presentation are based on the formats of interim financial information attached in an Office of Insurance Commission’s Notification “Principle, methodology, condition and timing for preparation, submission and reporting of financial statements and operation performance for non-life insurance company (No.2) B.E. 2562” dated on 4 April 2019 (“OIC Notification”).

The interim financial information should be read in conjunction with the annual financial statements for the year ended 31 December 2019.

An English version of the interim financial information has been prepared from the interim financial information that is in the Thai language. In the event of a conflict or a difference in interpretation between the two languages, the Thai language interim financial information shall prevail.

The accounting policies used in the preparation of the interim financial information are consistent with those used in the annual financial statements for the year ended 31 December 2019, except as described in note 3.

Costs that are incurred unevenly during the financial year are anticipated or deferred in the interim report only if it would also be appropriate to anticipate or defer such costs at the end of the financial year.

Income taxes in the interim periods are accrued by using the expected income taxes in the interim period.

The image shows a circular stamp of AXA Insurance Public Company Limited with the Thai text "บมจ. แอกซ่า ประกันภัย" below it. To the right of the stamp is a handwritten signature and a checkmark.

2 Accounting policies (Cont'd)

2.2 New and amended financial reporting standards that are effective for accounting period beginning or after 1 January 2020

TAS 12	Income tax
TAS 19	Employee benefits
TFRIC 23	Uncertainty over income tax treatments

*Amendment to TAS 12, Income tax* - clarified that the income tax consequences of dividends of financial instruments classified as equity should be recognised according to where the past transactions or events that generated distributable profits were recognised.

*Amendment to TAS 19, Employee benefits (plan amendment, curtailment or settlement)* - clarified accounting for defined benefit plan amendments, curtailments and settlements that the updated assumptions on the date of change are applied to determine current service cost and net interest for the remainder of the reporting period after the plan amendment, curtailment or settlement.

*TFRIC 23, Uncertainty over income tax treatments* - explained how to recognise and measure deferred and current income tax assets and liabilities where there is uncertainty over a tax treatment. In particular, it discusses:

- That the Company should assume a tax authority will examine the uncertain tax treatments and have full knowledge of all related information, ie that detection risk should be ignored.
- That the Company should reflect the effect of the uncertainty in its income tax accounting when it is not probable that the tax authorities will accept the treatment.
- That the judgements and estimates made must be reassessed whenever circumstances have changed or there is new information that affects the judgements

The Company has already adopted above revised standards for the current reporting period. The management assessed that the above revised standards do not have significant impact to the Company

AXA Insurance  
Public Company Limited  
บมจ. แอกซ่า ประกันภัย

**3 Adoption of new financial reporting standards, changes in accounting policies, and change in presentation**

**Adoption of new financial reporting standards**

On 1 January 2020, the Company passes criteria of temporary exemption from TFRS 9 Financial Instruments and TFRS 7 Financial Instruments: Disclosures under TFRS 4 (revised 2018) Insurance Contracts. The Company is eligible to apply the 'financial instruments and disclosures for insurance companies' accounting guidance' ('The Accounting Guidance').

The Company has adopted financial reporting standards relating to financial instruments (TAS 32, and The Accounting Guidance) and leases standard (TFRS 16) retrospectively from 1 January 2020, but has not restated comparatives for the 2019 reporting period, as permitted in the standards. The reclassifications and adjustments arising from the new requirements are therefore recognised in the opening statement of financial position on 1 January 2020.

The Company has apply the following application of the temporary exemption guidance to relieve the impact from COVID-19 (temporary measures to relieve the impact from COIVD-19) announced by the Federation of Accounting Professions (TFAC) for the reporting periods ending between 1 January 2020 and 31 December 2020.

**Reversal of deferred tax assets**

The Company has chosen to exclude information related to COVID-19 which causes uncertainty when considering the sufficiency of future taxable profit for the purpose of assessing the utilisation of deductible temporary differences. Instead, the Company writes down the carrying amount of the deferred tax assets when it's not probable that the future taxable profit will be available for utilising the deductible temporary differences.

The following tables show the adjustments made to the amounts recognised in each line item in the statement of financial position upon adoption of the financial reporting standards relate to financial instruments (TAS 32 and The Accounting Guidance) and leases standard (TFRS 16):

	As at 31 December Previously reported	TAS 32 and The Accounting Guidance Reclassifications and adjustments	TFRS 16 Reclassifications and adjustments	As at 1 January 2020 Restated

<b>Total liabilities and equity</b>	<b>(680,183,670)</b>	<b>28,864,283</b>	<b>59,597,830</b>	<b>(591,721,557)</b>

**3 Adoption of new financial reporting standards, changes in accounting policies, and change in presentation (Cont'd)**

The adoption of the new financial reporting standards on financial instruments mainly affects the Company's accounting treatment as follows:

Classification and measurement

The Company has equity instruments measured at cost of Baht 0.9 million. These instruments will be remeasured to fair value through other comprehensive income and reclassified with a corresponding adjustment to equity of Baht 28.9 million as of 1 January 2020.

Impairment

The new requirements on the impairment losses will lead to expected credit losses having to be considered and recognised at the initial recognition and subsequent period. The Company accounts for expected credit losses which involves a three-stage expected credit loss impairment model. The stage dictates how the entity measures impairment losses and applies the effective interest rate method. As of 1 January 2020, the Company recognised impairment losses for investment in securities of Baht 18.2 million. The transition adjustment will be recognised as an adjustment to the opening balance of retained earnings.

The adoption of the new financial reporting standards on leases mainly affects the Company's accounting treatment as follows:

Classification and measurement

On adoption of TFRS 16, the Company recognised lease liabilities in relation to leases which had previously been classified as 'operating leases' under the principles of TAS 17 Leases. These liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as of 1 January 2020. The weighted average lessee's incremental borrowing rate applied to the lease liabilities on 1 January 2020 was 6%.

	<u>Baht</u>
Operating lease commitments disclosed as at 31 December 2019	22,034,347
Discounted using the lessee's incremental borrowing rate of at the date of initial application	(8,055,231)
Less: low-value leases recognised on a straight-line basis as expense	(8,309,000)
Add: adjustments as a result of a different treatment of extension and termination options	54,602,763
<b>Lease liability recognised as at 1 January 2020</b>	<b><u>60,272,879</u></b>

**3 Adoption of new financial reporting standards, changes in accounting policies, and change in presentation (Cont'd)**

The associated right-of-use assets for building leases were measured on a retrospective basis as if the new rules had always been applied. The right-of-use assets were measured at the amount equal to the lease liability, adjusted by the amount of any prepayment relating to that lease recognised in the statement of financial position as at 31 December 2019. There were no onerous lease contracts that would have required an adjustment to the right-of-use assets at the date of initial application.

The recognised right-of-use assets relate to the following types of assets:

	<b>31 March 2020 Baht</b>	<b>1 January 2020 Baht</b>
Buildings and improvements	58,717,896	62,443,578
<b>Total right-of-use assets</b>	<b>58,717,896</b>	<b>62,443,578</b>

Practical expedients applied

In applying TFRS 16 for the first time, the Company has used the following practical expedients permitted by the standard:

- the use of a single discount rate to a portfolio of leases with reasonably similar characteristics
- reliance on previous assessments on whether leases are onerous
- the accounting for operating leases with a remaining lease term of less than 12 months as at 1 January 2020 as short-term leases
- the exclusion of initial direct costs for the measurement of the right-of-use asset at the date of initial application
- the use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease, and
- elect not to reassess whether a contract is, or contains a lease as defined under TFRS 16 at the date of initial application but relied on its assessment made applying TAS 17 and TFRIC 4 Determining whether an Arrangement contains a Lease.

**Changes in accounting policies from adoption of the financial reporting standards related to financial instruments and leases**

Investment in securities

Classification and measurements

From 1 January 2020, the Company classifies its financial assets as follows:

- Investments measured at fair value through profit or loss (FVPL)
- Investments measured at fair value through other comprehensive income (FVOCI)
- Investments measured at amortised cost

The Company initially recognises a financial asset on trade date at its fair value plus transaction costs that are directly attributable to the acquisition of the financial asset.

The Company has chosen to apply the temporary measures to relieve the impact from COVID-19 announced by TFAC for the reporting periods ending between 1 January 2020 and 31 December 2020 when measuring unquoted equity investments. The unquoted equity investments at the end of the reporting period was presented at the same amount as their fair values on 1 January 2020. As a result, the equity investments measured at FVOCI as at 31 March 2020 of Baht 36,362,171 was measured at their fair value as of 1 January 2020.

**3 Adoption of new financial reporting standards, changes in accounting policies, and change in presentation (Cont'd)**

**Changes in accounting policies from adoption of the financial reporting standards related to financial instruments and leases (Cont'd)**

Investment in securities, net (Cont'd)

Impairment

From 1 January 2020, the Company assesses expected credit loss on a forward looking basis for its financial assets carried at FVOCI and at amortised cost. The impairment methodology applied depends on whether there has been a significant increase in credit risk. The Company always accounts for expected credit losses which involves a three-stage expected credit loss impairment model. The stage dictates how the entity measures impairment losses and applies the effective interest rate method. In which, the three-stage expected credit loss impairment will be as the following stages:

- Stage 1 - from initial recognition of a financial assets to the date on which the credit risk of the asset has not increased significantly relative to its initial recognition, a loss allowance is recognised equal to the credit losses expected to result from defaults occurring over the next 12 months.
- Stage 2 - following a significant increase in credit risk relative to the initial recognition of the financial assets, a loss allowance is recognised equal to the credit losses expected over the remaining life of the asset.
- Stage 3 - When a financial asset is considered to be credit-impaired, a loss allowance equal to full lifetime expected credit losses is to be recognised.

The expected credit loss will be recognised in profit or loss.

Right-of-use assets and lease liabilities

The Company leases property, plant and equipment. Rental contracts are typically made for fixed periods of 3 to 5 years but may have extension options. Before 2020 financial year, leases of property, plant and equipment were classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) were charged to profit or loss on a straight-line basis over the period of the lease.

From 1 January 2020, leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Company. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. Right-of-use assets are recorded in the statement of financial positions.

**3 Adoption of new financial reporting standards, changes in accounting policies, and change in presentation (Cont'd)**

**Changes in accounting policies from adoption of the financial reporting standards related to financial instruments and leases (Cont'd)**

Right-of-use assets and lease liabilities (Cont'd)

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- variable lease payment that are based on an index or a rate
- amounts expected to be payable by the lessee under residual value guarantees
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease prepayments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- restoration costs.

Payments associated with short-term leases and leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprise car rental agreement.

**4 Estimates**

The preparation of interim financial information requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing this interim financial information, the significant judgements made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the financial statements for the year ended 31 December 2019.

**5 Fair value**

**5.1 Fair value estimation**

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3: Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

The following table presents the financial assets that are measured at fair value at 31 March 2020 and 31 December 2019.

	31 March 2020 (Unaudited)			
	Level 1 Baht	Level 2 Baht	Level 3 Baht	Total Baht
<b>Asset</b>

 Public Company Limited  
 บมจ. แอกซ่า ประกันภัย

**5 Fair value (Cont'd)**

**5.2 Valuation techniques**

**5.2.1 Valuation techniques used to measure fair value level 2**

Level 2 debt investments of marketable securities are fair valued using discounted cash flow model based on individual debt instrument's yield curve published by the Thai Bond Market Association at the end of reporting period.

**5.2.2 Valuation techniques used to measure fair value level 3**

Changes in level 3 financial instruments for the three-months period ended 31 March 2020 is as follows:

	<b>Unaudited 31 March 2020 Baht</b>
Beginning balance of the period/year	36,362,171
Unrealized gain (loss)	-
Closing balance of the period/year	<u>36,362,171</u>

Valuation process

Management has put a process of performing the valuations of financial assets required for financial reporting purposes, including Level 3 fair values. Appropriate valuation techniques and unobservable inputs are selectively used based on the characteristic of financial assets. The valuation of Level 3 fair value is reviewed and approved by management for financial reporting purposes.

Fair value hierarchy level 3 of Road Accident Victims Protection Co., Ltd. is determine based on fair value calculated using discounted cashflows method announced by Thailand General Insurance Association.
